

The visualization you about to see is a presentation in graphics of various terrorism related violent attacks in many countries of the world from the 1970s to 2006. It was web-scraped from Kaggle and uploaded by a user. The link is :

<https://www.kaggle.com/START-UMD/gtd>. The following questions were addressed:

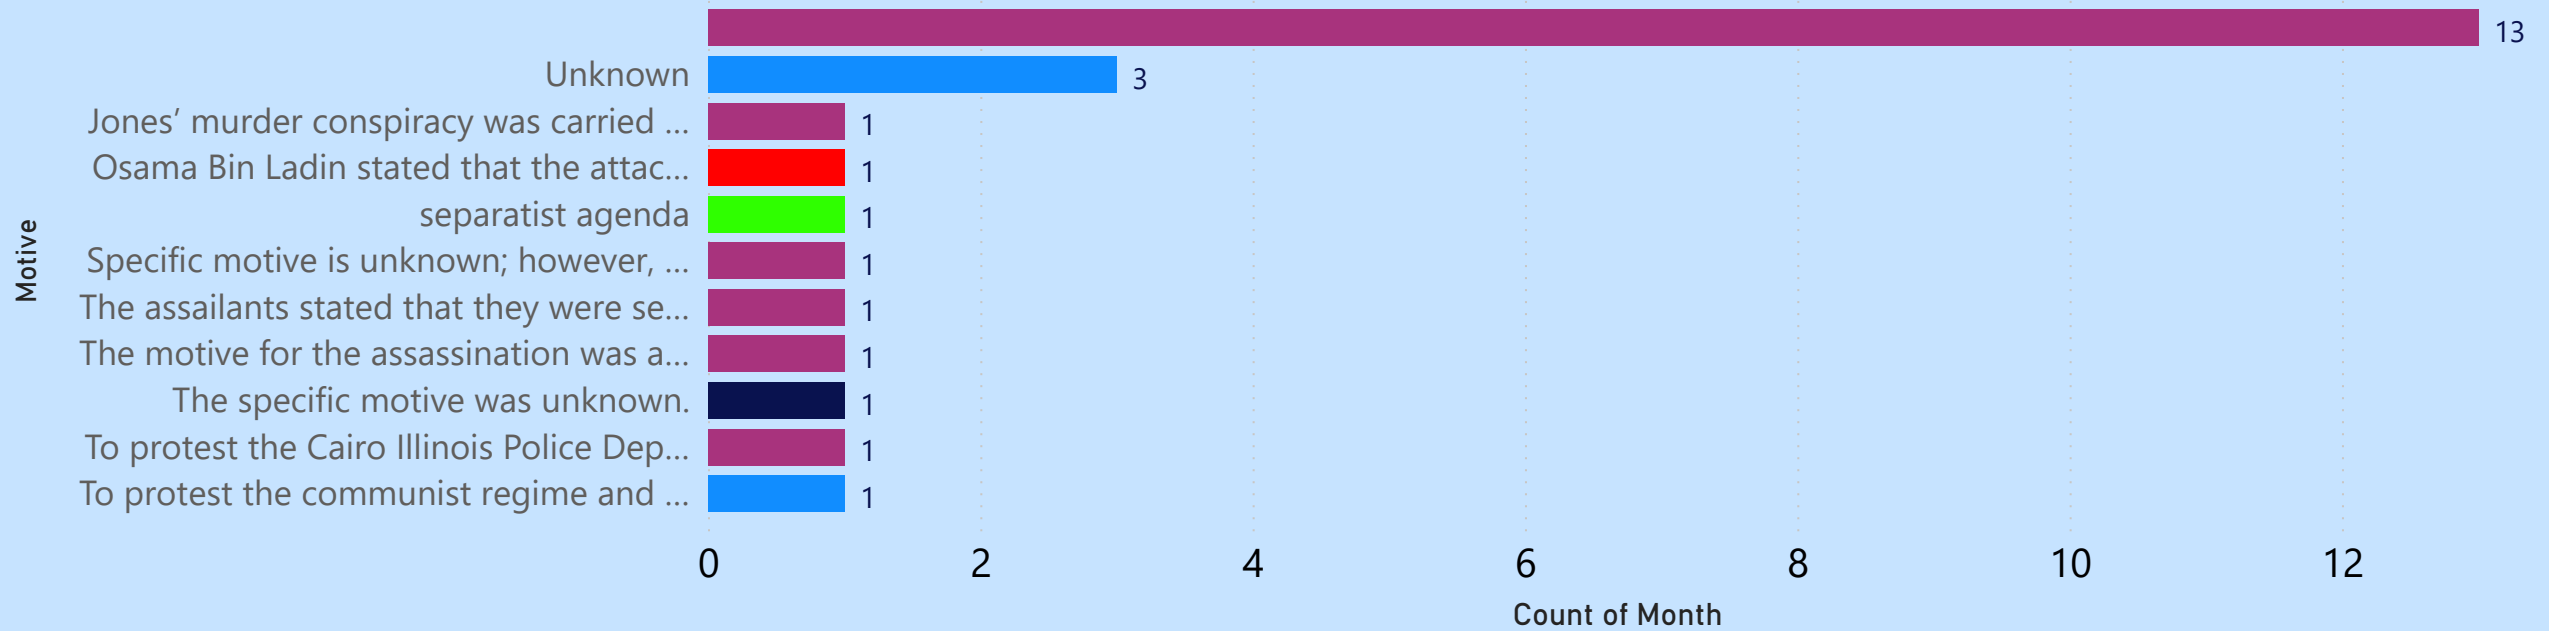

1. What are the possible variations in motives and weapon used in different months?
2. Were ransoms paid to perpetrators and if yes, what was the amount paid in dollars?
3. The total number of persons killed or wounded through different methods of attack?
4. What is the overall success rates of different types of attacks?
5. Type of attack by year differences?
6. The countries most affected by hostage taking?
7. The total worth of properties destroyed and lots more.
